## *A Nurse Practitioner is the best of both worlds*

## The medical advice of a doctor *The compassionate care of a nurse!*

### What is a Nurse Practitioner?

Nurse Practitioners (NP) are independent healthcare providers that provide primary care services. NPs provide cost-effective, high quality primary care. NPs can be found in many different practices and specialties and provide care to patients of all ages.

### Nurse Practitioners:

- Work with patients to develop an individualized care plan
- Assist in preventative and wellness care
- Diagnose and treat many healthcare needs
- Work as patient advocates for care
- Collaborate with other healthcare professionals
- Order, perform, and evaluate necessary tests
- Prescribe medications
- Build relationships with patients to ensure the best plan of care is provided

Putnam County Hospital is home to Nurse Practitioners Windy Watt and Rachel Goss. Watt is currently practicing at North Putnam Family Healthcare in Bainbridge. Goss is working with the new hospitalist program to better serve our inpatients at the hospital.

*More services. Quality care. Close to home.*
